

WHO WE ARE

Sapphire Health is a cohesive and award-winning team of exceptional Epic technical consultants committed to solving the technical challenges associated with a complex Epic environment. We cover every aspect of the core technical requirements and work as a team. Because at Sapphire Health, we believe a team is stronger than the sum of its parts.

We provide optimization to fully managed services for all aspects of Epic infrastructure. We take care of all ODBA requirements for Cache and IRIS, handle the ECSA requirements and everything in between. We can accommodate different levels of scope from full technical team managed services to optimization of specific areas or functions.

Most people think core Epic technical services aren't sexy. They're right. Technical services aren't sexy...

THEY'RE EVERYTHING.

RED HAT LINUX FOR EPIC

We provide planning, design and execution of Epic Cache and IRIS on Red Hat Linux for Epic systems. We build modern and scalable Epic Linux platforms according to best practices to ensure long term customer success.

We go way beyond advisory services because you deserve a partner that will do more than just tell you what you should do. From Epic environment strategy, license advisory, ODBA performance tuning, Ansible based automation, and Business Continuity, our goal is to deliver you a better managed and better running Epic Technical Environment.

 Optimizing Epic and RHEL maintenance and configuration with Ansible and other automation tools that simplify deployment, manage daily tasks and provide timely alerts.

 Performance tuning the infrastructure, RHEL platform, Cache ODBA, and hyperspace application presentation to help meet honor-roll technical infrastructure requirements.

 Ensuring uptime with best practice configuration for Epic Business Continuity, including optimal HA and DR with support for full DR activation testing with minimal user downtime to meet honor-roll requirements.
