The health and resiliency of a healthcare organization's Epic technical environment is paramount to ensure clinical, business, and logistical operations remain uninterrupted. Maintaining and optimizing this infrastructure is costly, requires deep technical knowledge, and has dynamic requirements over time.

Sapphire health has partnered with many organizations to manage their Epic technical infrastructure, from fully outsourced models to hybrid models with Sapphire's technical team supporting internal resources. Partner with Sapphire to take advantage of our experience, scale, and infrastructure automation capabilities.

FLEXIBLE ENGAGEMENT

Dynamic fixed-price engagement model where hours and responsibilities can ebb and flow as needed

TECHNICAL EXPERTS

Our technical team of Epic infrastructure experts are fully certified and deeply experienced

AUTOMATION

Take advantage of Sapphire developed infrastructure automation scripts including failover, environment refreshes, and provisioning
